

# Bulk Carrier Webinar Week

21-22 September 2021

Full Agenda

We are delighted to welcome [INTERCARGO](#) members to attend the upcoming Bulk Carriers Webinar Week.

Supporting organisation

Each webinar is free to attend and registration is now open.

## Safe and efficient cargo hold preparation for bulk carriers

21 September  
0900-0945 BST

Cargo hold preparation is a critical yet perilous aspect of bulk carrier shipping. Careful planning and competent execution throughout the cargo chain from the chartering and operations team ashore to the master, officers and crew onboard is essential. Failure to prepare risks cargo and contractual claims and endangers operations and life. This webinar will set out what's required, how to safeguard your approach, and lessons learned from accidents, incidents and oversights.

## Streamlining CII compliance for bulk carriers

22 September  
0900-0945 BST

The bulk carrier segment will face the greatest challenges of all maritime sectors in achieving positive Carbon Intensity Index (CII) ratings.

Your expert panellists will assess the options available to bulk carrier operators to improve their energy efficiency: fleet renewal, market-driven energy savings technologies and speed reduction. Decisions need to be taken now that balance compliance, efficiency, safety and contractual considerations against the tightest of regulatory deadlines.

## The real-time revolution for bulk carrier port calls

22 September  
1400-1445 BST

Real-time information gives bulk carrier operators the opportunity to lower emissions and costs by sailing more slowly, with lower emissions, and arriving at the port just in time and at the moment there is space available. Achieving this objective presents significant challenges for both the bulk carrier and the terminal operator. Chief among these challenges is the need for a degree of information sharing not seen previously as well as the introduction of new standards. This webinar will consider these issues and how digitalisation, IoT and artificial intelligence are enabling the revolution.
